Why does creating a website with us work?

- As Digital users are already looking to spend \$\$, (or Rs / DHS as the case may be) they come to the site with the intention of finding and purchasing a specific good or service.
- The layout of the site allows advertisers to exclusively target people who are already interested in their goods or service by purchasing targeted advertising.
- For more information on the groups that can be targeted and how and what kind of website you should have or create according to market standards you can contact us at +971567124589 / +919731800800.

What are static websites?

- There are many static websites on the Internet, you won't be able to tell immediately if it is static, but the chances are, if the site looks basic and is for a smaller company, and simply delivers information without any bells and whistles, it could be a static website.
- Static websites can only really be updated by someone with a knowledge of website development.
- Static websites are the cheapest to develop and host, and many smaller companies still use these to get a web presence.
- we can advise or help to develop both static and dynamic websites.

Why does creating a website with others **don't** work?

Advantages of static websites

- Quick to develop
- Cheap to develop
- Cheap to host
- Use Readymade template (which comes for free)
- Cheaper to implement on a smaller scale as fewer pages are needed
- Flexibility is restricted to a template layout (can affect website usability)

Disadvantages of static websites

- Can not change content
- Can not change images
- Requires web development expertise to update site
- Site not as useful for the user
- Content can get stagnant
- No SMS integration
- No Email Integration

Why does creating a website with **Us** work?
